SUCCESS-POWER

Your "Future"

A great many people talk about their futures—their careers-as though these were things that would just happen, regardless of any individual effort on their part.

That's about as sensible as putting a handful of watchparts in a drawer and expecting to take out a finished time-piece a month later.

Somebody has to put the watch together—you have to do the same thing to your future.

The possibilities of a man's position depend on himself. Opportunity is an internal affair.

Men don't meet with success-they have it within them and when the time comes, bring it forth before all the world.
